

Stamford – HTML5 Photography Portfolio & Blog

This unique template is a responsive and retina-ready HTML5 website with grid system layout, which is based on my best selling template to date: MyFolio.

Stamford uses Isotope2 for enhanced site speed and stability, is optimized for mobile touch and swipe gestures, and features hover-intent detection, a sophisticated blog setup, and completely flexible text boxes.

Design

It comes with a fully customizable HTML file with grid system responsive layout.

Features

- Valid HTML5 / CSS3 pages
- Perfectly responsive
- Retina-Ready
- Cross browser compatible – tested in IE 9,10,11; Firefox; Safari; Chrome and Opera.
- Well formatted and commented, so it should be easy to adapt and extend
- One-Page Website includes:
 - Home
 - Portfolio (+ separate Gallery and Video Page)
 - About
 - Services
 - Blog (+ separate Post Page)
 - Contact
- Working ajax contact form with validation and working PHP mailer script
- Retina-Ready Icons from demo plus additional ones (about 70) are included (if more are needed, 1640 vector icons can be purchased here: <http://www.streamlineicons.com/>)
- Custom print css stylesheet

Fonts

The following fonts were used:

- Open Sans (Google font)
- Oswald (Google font)
- Lora (Google font)

Extensions

Other items we used:

Images are not included, but can be bought here:
