Support & FAQ

Thank you for purchasing this HTML Template! I'd be glad to help you if you have any questions relating to this theme. No guarantees, but I'll do my best to assist. If you have a more general question relating to the themes on ThemeForest, you might consider visiting the forums and asking your question in the "Item Discussion" section.

How to add another section?

Add this: <li> Section-Name to the "main nav" menu and give all content columns its corresponding class (<div class="element clearfix col1-3 section-name">).

How to add another tile?

Here you can choose between 1/3, 2/3 or 3/3 columns.

Keep in mind that all columns (except the .auto columns, which are used for example as blog posts or portfolio item descriptions) have a fixed height, so that the masonry filter can perfectly align the content pixel.

NOTE: the "home" class is used to display a tile on default (on the home page).

How to add fancybox lightbox and create groups of images/videos?

Wrap this around the image(s) or icon(s) where you want to add a larger image opening in lightbox uponmouseclick:

For single Image:

For a group of images:

For a video popup:

You can also add more groups by giving them a different data-fancybox-group name.

How to change the email address to which emails are sent from the contact form?

Find in contact.php: $address = 'hello@email.com';

There you can enter your email address. A few lines further down, you can also change the text which is

displayed in the email.

When adding your own logo…

In styles.css line 112, you need to change the following:

Add your own background image, change the background size as well as the height and width of the link itself. Try to keep it close to the original in size and below 150px width so it fits on small mobile screens.

Need more (social) icons?

You find the codes in styles.css from line 151 (social) and line 237 (standard) on. If you need more icons added to the font, just drop me an email.

If you need help, just email me over my profile page!
